

# MERLIN WASTE TANK

## WASTE STORAGE TANK SYSTEM

WASTE TANK 4000L - GREY

Large ablution block, but no sewer connection? The Waste Tank is the hygienic, long-lasting solution.

The Waste Tank is an engineering-certified effluent tank, designed to sit underneath large ablution blocks — particularly on large construction sites without a sewer connection (or perhaps a special event or an army camp).

A sturdy, durable, rust-free construction, the Waste Tank is engineered from rigid polyethylene surrounded by a heavy-duty steel frame, and it's rated to support a building mass of up to 7000kg plus 12 persons.

Available in three different sizes (2000L, 4000L & 6000L), the Waste Tank is suited to ablution block buildings up to approximately 6m long and 2.4m wide.
